# SETTINGS

**LOT** - THE FIX LOT SIZE WHICH YOU WANT TO USE FOR TRADING.

**AUTOLOTS** - IF YOU WANT ROBOT TO AUTO CALCULATE THE LOT SIZE SET TO **TRUE**. IF **FALSE**, THEN YOU WILL TRADE WITH LOT SIZE WHICH YOU'VE SET ABOVE.

**RISK** - THE PERCENTAGE OF THE DEPOSIT WHICH YOU ARE READY TO TAKE RISKS. IN THE WORST CIRCUMSTANCES, YOU WILL NOT LOSE MORE THAN THE VALUE WHICH YOU SET. WORKS ONLY WITH **AUTOLOTS = TRUE**

**CUSTOMTPMODE** - IF YOU WANT TO SET TP BY HAND SET THIS PARAMETER TO **TRUE**. LEAVE IT **FALSE** FOR AUTO CALCULATION OF TP

**CUSTOMTP** - VALUE OF TP IN THE CURRENCY OF DEPOSIT. WORKS ONLY WITH **CUSTOMTPMODE = TRUE**

## EXAMPLE:

IF YOU SET **CUSTOMTP=100** AND YOUR DEPOSIT IS **\$1000**, THEN AT THE TIME WHEN ORDERS REACH A TOTAL OF **\$100** PROFIT, ALL TRADES WILL BE CLOSED. AND AFTERWARD YOU WILL HAVE **\$1100** IN YOUR ACCOUNT

**AUTOTP** - VALUE OF TP IN PERCENT OF DEPOSIT. WE RECOMMEND USE THIS PARAMETER WITH **AUTOLOTS = TRUE**

## EXAMPLE:

IF YOU SET **AUTOTP=10%** AND YOUR DEPOSIT IS **\$1000**, THEN AT THE TIME WHEN ORDERS REACH A TOTAL OF **\$100** (10% OF YOUR CURRENT DEPOSIT) PROFIT, ALL TRADES WILL BE CLOSED. SO YOU WILL HAVE **\$1100** IN YOUR ACCOUNT.

**DYNAMICTPMODE** - A MODE IN WHICH THE TP WILL INCREASE DEPENDING ON THE NUMBER OF WAVES IN THE MARKET

## EXAMPLE:

THE STRATEGY OF THE EA INCLUDES INCREASING OF ORDERS SOMETIMES. SO IF YOU WANT ADVISOR AUTOMATICALLY INCREASE YOUR TP WITH INCREASING AMOUNT OF ORDERS - SET THIS PARAMETER TO **TRUE**.

**CLOSEALL** - IF **TRUE** ALL ORDERS WILL BE CLOSED IMMEDIATELY

**STARTNEXT** - IF YOU DON'T WANT TO START NEW TRADES RIGHT AFTER WHEN THE EA REACHES TP - SET THIS PARAMETER TO **FALSE**.  
BY DEFAULT **STARTNEXT=TRUE**

**ACCOUNTMICRO** – YOU SHOULD SET TO **TRUE** IF YOU TRADING ON MICRO-ACCOUNT. IF THE SIZE OF ONE EURUSD PIP WITH 0.1 LOT EQUALS \$1 THATS MEAN YOU HAVE A STANDARD ACCOUNT AND THE VALUE OF THE PARAMETER SHOULD BE **FALSE** BY DEFAULT

**STEP** - THE STEP (IN PIPS) THROUGH WHICH THE EA WILL OPEN THE SECOND WAVE OF ORDERS IN CASE OF LOSS.

**NUMBEROFORDERS** - THE NUMBER OF ORDERS IN ONE WAVE (FROM 3 TO 10)

**MAGIC** - YOU CAN LEAVE THIS BY DEFAULT. THIS IS A UNIQUE NUMBER THAT ALLOWS THE ROBOT TO TRACK ITS TRADES.

**EURGBP, GBPUSD, EURAUD ETC.** - IF YOU WANT TO TRADE WITH PARTICULAR PAIRS SET THEM TO **TRUE**, IF DON'T - **FALSE**

### EXAMPLE:

THE ADVISOR ALWAYS CHOOSES PAIRS WITH THE MOST RELIABLE AND STRONGEST SIGNAL FROM THE PAIRS WHICH YOU CHOSEN. IF YOU CHOSEN **15** CURRENCY PAIRS AND **NUMBEROFORDERS=5**, IT MEANS THAT THE ADVISOR WILL CHOOSE **5 PAIRS** (FROM **15 CURRENCY PAIRS**) WITH THE BEST SIGNALS AND OPEN ORDERS.

**TRENDPERIOD** - PERIOD OF TIME WHICH THE EA WILL USE FOR DETERMINING THE TREND OF THE MARKET.

### THIS PARAMETER CAN HAVE ONLY TWO FOLLOWING OPTIONS\*\*:

- FOR **WEEKLY** (GLOBAL) PERIOD OF TIME YOU SHOULD SET **10 080** MIN
- FOR **DAILY**(LOCAL) PERIOD OF TIME YOU SHOULD SET **1440** MIN

**\*\*DON'T SET ANY OTHER VALUES OF THIS PARAMETER**
